

Alumni Educational Solutions

We have an obligation to be the Teacher's Assistant, the Architect's Inspiration and to support students in their learning environments.

Our primary goal is to inspire creative thought and create innovative classroom environments that allow adaptability to the ever changing ways of learning while giving students the opportunity to excel.

Educational practices are moving at the speed of light. The best way to assist the teacher is to design flexibility into the classroom. The ability to adapt learning environments at the same pace is critical to allow educators to leave no child behind.

We want to see each child given the opportunity to advance and receive the newest teaching methods.

All our products are designed, engineered and manufactured to strict quality standards that are inspected numerous times during our process, including a final inspection prior to packaging for shipment.

We look forward to making your classroom furniture purchase an enjoyable experience.

Collaborative Learning encourages active participation in the classroom. Working in smaller groups leads to discussions that develop a greater understanding of the subject matter among all participants.

The y5 Mission

Greater Understanding

Higher Achievement

Significantly Better Results

The foundation for a productive 21st Century Collaborative environment begins with the ability to position students in the most effective groupings. Studies show the most effective group sizing is 5. In a group of 5, eye contact through cross-directional positioning plays a major role in how all participants will participate and interact with one another.

Each group requires a teacher-selected mix of Overachievers, Middle-achievers and Underachievers. These diverse groupings will ensure engagement and participation by everyone in the group. With the suitable environment in place, the teacher becomes the 'Conductor of the Orchestra'; they will continually steer the comprehension of the subject matter onto its correct course.

Without a collaborative environment, a 50-minute class with 30 students would only allow the teacher just over one minute with each student and does not include any of the time spent teaching the lesson.

So Y5?

Studies show that groups of 5 are the most effective grouping number for collaborative learning:

If you measure the number of possible social interactions with varying groups, the optimal group size appears to be 5. The number of social interactions begins to explode in groups with more than 5 people.

– Sheila L. Margolis, PhD President
Workplace Culture Institute

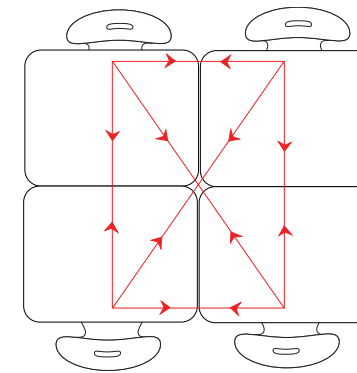

Researchers report that, regardless of the subject matter, students working in small groups tend to learn more of what is taught and retain it longer than when the same content is presented in other instructional formats.

– Barbara Gross Davis
Tools for Teaching - Stanford University

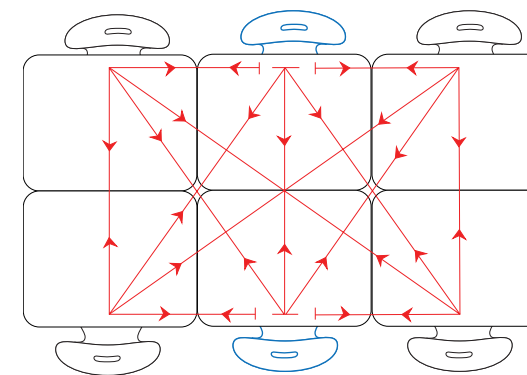

Misperception: Bigger is better. Actually: Excessive size is one of the most common—and also one of the worst—impediments to effective collaboration.

– J. Richard Hackman
Harvard Business Review

Traditional Group of 4

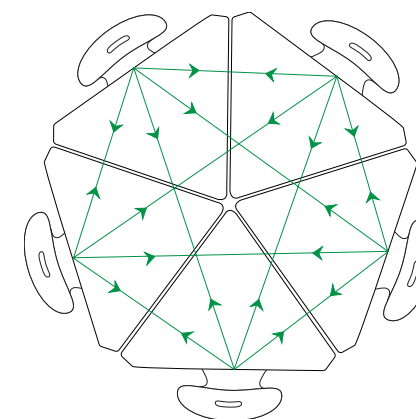

Traditional Group of 6

Group Leader Role
Created By Default
(Blue Chair)

Progressive Group of 5

21st Century Learning

Connecting Mind and Body

In the K-12 Learning Space, our goal is to empower students to have equal influence and discussions within the group through the proper arrangement of desks and seating positions. A study from the University of Montana indicates that "Round or Pentagon Groups" create a 'Web Network', a cross-directional method of communication in which members are encouraged to communicate directly with each other, resulting in information being shared more rapidly and each member feeling they have an equal influence within the group.

Traditional Rectangular Groups

In the Traditional Rectangular Group of 4, there is often a pairing off of partners. Traditionally, this is the position that negotiators would prefer to be in and is recognized as a "Face Off" position.

When one more participant is added on each side of the group, creating a Traditional Rectangular Group of 6, two additional problems are created that are not conducive to a K-12 Collaboration:

1. A lack of visual contact with every group member occurs
2. The middle person in each row of three will typically end up taking on a dominant role of being a mediator or group leader

Progressive Round or Pentagon Groups

This type of seating arrangement is not new but can provide insight into the way that human interactions can be enhanced. The most famous example of this was King Arthur and the Knights of the Round Table: Every Knight that sat around the table was considered to be an equal to his peers and there was no central power position.

In the Progressive Round or Pentagon Group, visual contact is inclusive and there is no dominant seating position in the group. The ability to visually see all of the group members is vitally important since it promotes the ability to interact and share ideas. Through visual contact, body language is displayed in four different ways:

1. Head Movement
2. Facial Expressions
3. Body Posture
4. Hand and Finger Gestures

Simply by having visual contact with all group members, a quick determination about the participation levels can be made:

- Are all group members paying attention?
- Are all group members participating?
- Is there a sense of agreement or disagreement among the participants?
- Is anyone choosing not to participate?

This arrangement creates a more cooperative situation for discussion and a sense of equality.

The Alumni Y5 Collaborative Groupings are designed around the knowledge that we have gained through these recognized studies. The Alumni Y5 Practices implement this knowledge in the most effective manner, creating the footprint for the most successful outcomes in the rollout and implementation of 21st Century Collaborative Learning.

At Alumni, we strongly believe in following the path of research and proven concepts when developing furniture solutions. Our goal is to create the absolute best opportunity for all students to succeed within their education.

21st Century Classroom Solutions

Alumni y5 Collaborative Groupings

The foundation for the implementation of a productive 21st Century Collaborative Learning environment begins with the ability to position students in the most effective collaborative groupings; studies show that the most effective grouping size is 5. Supportive research has been pivotal in the design and development of the y5 Flow, Pente and Idea Desks.

The original Flow Desk is a classroom solution that is appropriate for both traditional and progressive teaching styles. The unique shape and size of the Flow takes into consideration classroom size and is a solution that allows for multiple, functional group configurations while providing the option of individual testing or independent study.

For more information on the Flow Desk, please turn to pages 72-73.

Flow Desk

Pente Desk

The Pente and Idea Desks have a unique pentagonal shape that takes into consideration the need for furniture that is both a functional and a practical solution for 21st Century Learning. In their ideal groupings of 5, they support a Web Network-type of communication, allowing for cross-directional dialogue to occur during collaboration.

For more information on the Pente Desk, please turn to pages 74-75.

For more information on the Idea Desk, please turn to pages 76-77.

Idea Desk

21st Century Classroom Solutions

Alumni Complete Product Blend

The Alumni Soft Seating Series was developed to enhance any learning commons, student lounge or library. There are a multitude of combinations and configurations that can be accomplished with the range of shapes and sizes available.

For more information on Soft Seating, please turn to pages 66-67.

The Alumni Makerspace Works Steel Stool provides a modern and practical solution for versatile classrooms that engage students through multiple learning techniques.

For more information on the Makerspace Works Steel Stool please turn to page 65.

The Alumni Makerspace Works Tables are a practical and adaptable table solution for several classroom settings. By having a collection of top materials, these tables can be utilized in any learning environment.

For more information on the Makerspace Works Tables, please turn to pages 172-174.

The Alumni Accelerator Teacher Desk and Sit-Stand Crescent Desks are products that when combined are a modern twist on the traditional teacher desks as they provide teachers a space to meet with one or more students comfortably while being mobile.

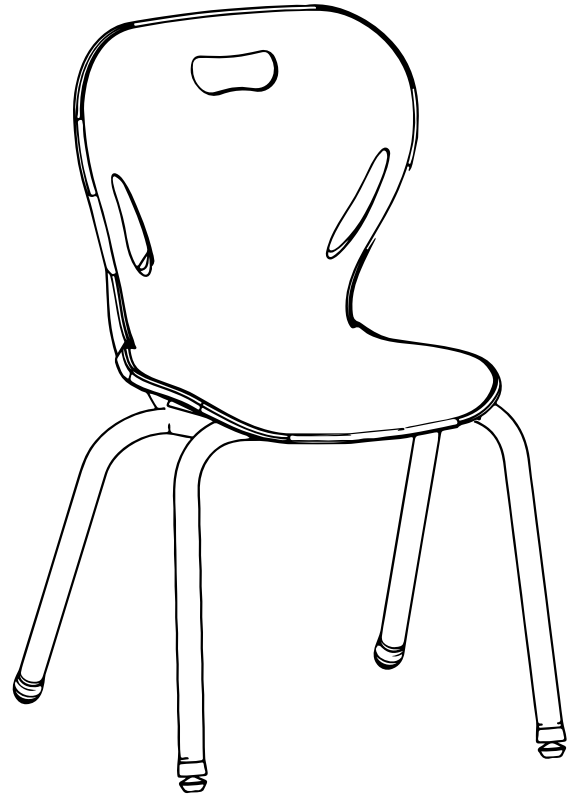

For more information on the Accelerator Teacher Desk and Sit-Stand Crescent Desks, please turn to pages 194-195.

The Alumni Accelerator Active Learning Centers are multi-functional and are equipped with a variety of options to match the fast-paced and moving classroom environments.

For more information on the Accelerator Active Learning Centers, please turn to pages 186-193.

FLOW CONFIGURATIONS

Flow Desk

The Ideal Group Size for Collaborative Learning

The Alumni Flow Desk was developed for traditional and progressive teaching styles to help implement 21st Century Learning concepts into the classroom. Optional casters make these desks easy to pull apart for individual study and testing purposes, or to move into multiple group configurations. In its ideal group configuration of 5, it can be rearranged to maximize the use of limited space commonly observed in today's classrooms. Full-frame construction takes the wiggle out of learning.

- Hard Plastic (HP) Top or 3/4" or 1 1/8" High Pressure Laminate (HPL) Top with PVC Edge
- Fully welded table frame and leg assembly made of full perimeter 3/4" steel tubing welded to four 1 1/2" leg mounts designed to accept 1 1/8" O.D. round steel upper tube with inner round telescoping tube, adjustable height 22"-30"
- 100" Polyester Premium Powder Coat Finish
- Standard Glides: Marquis Nylon Swivel
- Optional Glides: Marquis Neoprene Swivel, Marquis Steel Swivel, Felt Snap-On, Q-Ball or Quiet Glide
- Options: Bag Hooks, Fixed Height, Solid or Perforated Steel Pass-Through Book Box, Pass-Through Wire Shelf, Tote Tray Housing, Two Legs with 2" Dual Wheel Locking Caster, ADA Height (26"-34"), or Standing Height (34"-42")

Idea Desk

Where Ideas Come Together

The Alumni Idea Desk provides a central work area for collaboration, with flexibility to offer a space in the middle for power and data capability. Optional casters make these desks easy to pull apart for individual study and testing purposes, or to move into multiple group configurations. In its ideal group configuration of 5, it can be rearranged to maximize the use of limited space commonly observed in today's classrooms.

- 3/4" or 1 1/8" High Pressure Laminate (HPL) Top with PVC Edge
- Fully welded table frame and leg assembly made of full perimeter 3/4" steel tubing welded to four 1 1/2" leg mounts designed to accept a 1 1/8" O.D. round steel upper tube with inner round telescoping tube, adjustable height 22"-30"
- 100% Polyester Premium Powder Coat Finish
- Standard Glides: Marquis Nylon Swivel
- Optional Glides: Marquis Neoprene Swivel, Marquis Steel Swivel, Felt Snap-On, Q-Ball or Quiet Glide
- Options: Bag Hook, Fixed Height, Solid or Perforated Steel Pass-Through Book Box, Pass-Through Wire Shelf, One Leg with Two 2" Dual Wheel Locking Casters, ADA Height (26"-34") or Standing Height (34"-42")

Boomerang

The Alumni Boomerang Desk was developed for traditional and progressive teaching styles to help implement 21st Century Learning concepts into the classroom. Students can sit at the Boomerang Desk front-facing, or left or right-handed tablet style. Optional casters make these desks easy to pull apart for individual study and testing purposes, or to move into multiple group configurations. In its ideal group configuration of 4, these desks fit together snugly with no wasted space in the center and can be rearranged to maximize the use of limited space commonly observed in today's classrooms. Full-frame construction takes the wiggle out of learning.

- Hard Plastic (HP) Top with Embossed Pencil Groove or 3/4" or 1 1/8" High Pressure Laminate (HPL) Top with PVC Edge

Stacking

The Alumni Honor Roll Stacking Tables are a space saving solution. These heavy gauge, fully-welded tables stack neatly and compactly. Effortless stacking design allows for tables to slide onto one another without lifting up and over. Four leveling bumpers on the underside of each table prevents scratching and scuffing when stacking.

Customer Support

Purchase Orders

Be sure to include:

- Quantity
- Model Number
- Description
- Color Choice (top, edge, frame color, shell for chairs)
- Price for each item including quote number is required as well

Alumni accepts orders via:

- Email: orders@alumnif.com
- Fax: 519.888.9395

Terms

Invoice terms for credit accounts are NET 30 days. Orders are invoiced on day of shipment. New customers are subject to credit application approval process.

Delivery

Product shipping weights are for product only. LTL shipments are sent on pallets. Pallet weights will be added to total weight for LTL shipments. Standard LTL shipments do not include additional accessorials.

Alumni will determine the mode and method which meet the best delivery criteria.

Freight

Do not refuse freight because of damage or shortage. All merchandise is packed to comply with carrier requirements. For your protection all shipments should be carefully inspected by the consignee before acceptance. The delivering carrier should be requested to record on the delivery receipt any damage to goods or cartons at time of delivery. Also, any shortages should be noted on the delivery receipt. If further damage is found after delivery, immediate notification of Alumni must occur and all cartons and merchandise must be held for inspection. Alumni will notify you if the inspection will take place or if the product is to be disposed. Please contact Alumni at customerexperience@alumnif.com to initiate the process.

Warranty

Alumni Educational Solutions has a Limited 15 Year Warranty. For complete details and a copy please contact Customer Experience at customerexperience@alumnif.com or call 1.833.939.9300.

CONTRIBUTING TO A GREEN PLANET

As a responsible member of the business community, it is our ambition to work towards easing the impact that manufacturing has on our environment. Our ongoing efforts are driving us towards sustainability as we are committed to leaving the environment better than we found it.

REDUCE. REUSE. RECYCLE.

Alumni applies a concentrated effort to the three R's within our production, packaging and shipment process. The result of our motivation is having a cleaner environment that produces less waste and uses as many recyclable materials as possible. The policy of Reduce, Reuse, Recycle is so important to us that even this catalog is printed on recycled paper.

Alumni has implemented a Safe Materials Testing Program (SMTP) to ensure that all materials that are used meet or exceed Federal Regulation. Our products are tested to meet ASTM, NEMA and Fed Spec Standards as well. Alumni uses Internationally Renowned Testing Labs to ensure product safety and quality.

We want our children to grow up in a healthy environment so that their children can do the same.

Alumni Classroom Furniture is compliant with the testing requirements in the Consumer Product Safety Improvement Act 2008.
